Technical information

Print files must be sent in JPG with 200 DPI and sRGB IEC61966-2.1 color profile. Layout design can be done directly on our free [KoyDesign.It](#) software fully integrated with the ordering process. Our templates are also available in [SmartAlbums](#), [FundyDesigner](#) and [AlbumStomp](#). If you prefer you can use Photoshop with the help of our templates available for download in your client area [My.KoyLab](#). Our templates already include the cutting margin of 5 mm. Do not place any important elements of the photo in this area as it will be cropped. Despite the precision of the guillotines, the cut may deviate slightly.
