

WHAT IS EMBROIDERY?

Embroidery is a high-quality and durable customisation technique. Our embroidery is done by machine but through a very delicate and artisanal process, allowing for an elegant and quality finish.

WHERE CAN I DO EMBROIDERY?

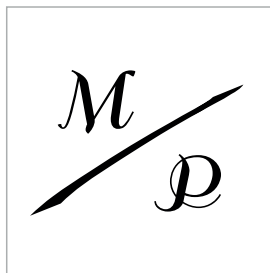

You can customise the covers with embroidery - on the front of the product - as long as the product allows it. You can choose a Koy Lab design or you can use your own design.

AVAILABLE DESIGNS

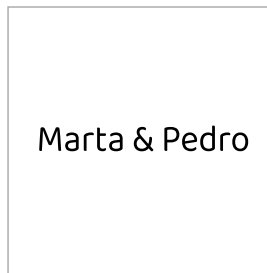

Koy Lab offers several designs. When ordering, you can select and customise the design. If you wish, you can send your own file.

SEND IN YOUR OWN ITEM TO ADD CUSTOM EMBROIDERY

Send us your design and we'll make a customised embroidery to suit your needs. For everything to go well, it must have the following characteristics:

- *.jpg file, with a white background, or;
- *.pdf with a white background, or;
- vector (.ai or .eps) with a white background;
- in vectors, the fonts must be converted into curves.

IMPORTANT: In the files you send, you should bear in mind that, due to the nature of the process, elements that are too thin may not have the desired visibility. We recommend using elements that are at least 3mm thick.

IMPORTANT NOTES

- The embroidery will be done exactly as you write it, in the selected font;
- You should always confirm the characters to be embroidered;
- The maximum width of the embroidery varies according to the size of the album or book, so there may be adjustments;
- If in doubt, you should confirm the possibility of embroidery with your Account Manager before placing the order;
- Due to measurements, it is not always possible to embroider copies.
